Rings Stop going  
round in circles

Rings honour the circle, a geometric shape symbolising wholeness, harmony, and unity, while contributing to better room acoustics thanks to high absorption properties.

DE

Rings erweisen dem Kreis Ehre, einer geometrischen Form, die Ganzheit, Harmonie und Einheit symbolisiert und durch gute Absorptionseigenschaften zu einer besseren Raumakustik beiträgt.

PL

Rings wzorowane są na geometrycznym kształcie koła, symbolu perfekcji, harmonii i jedności. Ich doskonałe właściwości dźwiękochłonne pozwalają nadać pomieszczeniu lepszą akustykę.

Check how stellar you look in a circle by adding a mirror in the center of our Rings! Alternatively, if you want to further boost sound absorption properties, add a round panel from our Blocks family to the composition. Use the same color on all Rings to keep it calm, or play with colors and materials to boost their charisma!

Design by Jakub Sobiepanek

DE

Prüfen Sie Ihr Star-Potenzial und setzen Sie einen Spiegel in die Mitte unserer Ringe! Wenn Sie die Schallabsorptionseigenschaften noch steigern wollen, können Sie alternativ eine runde Platte aus unserer Blocks Familie hinzufügen. Verwenden Sie für alle Ringe die gleiche Farbe, um Ruhe auszustrahlen, oder spielen Sie mit Farben und Materialien, um ihr Charisma zu unterstreichen!

PL

Przejrzyj się w lśniącej tafli lustra umieszczonego wewnątrz paneli Rings! Jeśli zależy ci na dalszym zwiększeniu absorpcji dźwięku, w miejsce lustra dodaj do kompozycji okrągły panel akustyczny. Nadaj panelom spokojny wygląd, stosując jeden kolor dla wszystkich obręczy, lub baw się kolorami i tkaninami, aby podkreślić ich charyzmę!
