

MuteDesign®

The new **Space S**
phone booth.

Enjoy the silence

Why choose Space S?

Ultra high sound isolation

Space S pod has been developed together with a professional team of acousticians. A well-thought through construction and selection of materials inside its walls and roof make it one of the best performing pod on the market.

Efficient air circulation

A modern and powerful ventilation system allows you to work in comfort for a long period of time. Moreover, the ventilation system of Space S does not create additional noise above the usual sound level in the open-plan office.

Easy installation

Space S pod is shipped in several pre-assembled pieces, packed in a durable case. Installation is easy, and takes max. 90 minutes, so you can quickly assemble it for the first time or move it around the office if needed.

More than a simple Booth, Space S is packed with technological goodness in a meticulously designed construction, where you can be fully connected with the outside world while avoiding its day to day clutter. Its beautiful design & best in class acoustic properties, make Space S a refined symbiosis of style, craftsmanship and performance.

According to norm EN ISO 140-4:2000

Exterior walls & roof

Metal sheets painted in one of our carefully selected colours, enable high endurance of Space S pod, and give it a premium look.

Door frame

Door frame in a colourful laminate, veneer or premium laminate will match all styles of office interior design.

Construction

A stable construction made of carefully chosen materials allows for quick and easy installation and delivers extraordinary sound isolation.

Interior

Acoustic felt in one of two colour options ensures high sound absorption properties inside the pod, as well as high durability.

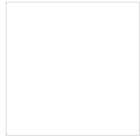

Appliances

Thanks to advanced technology built in Space S, such as USB port or induction charger, you will always stay connected.
