

# SoftBox

profim

"Modular seating systems so often suffer from having to have lots of legs – a forest of unrelated spindles! Our idea was to create a support structure which when used in a modular way becomes a simple sequence of fluid forms – the visual glue that holds a soft quiet upholstery design together and makes it special. With wood and aluminium frames we maximise the options."

**Paul Brooks** Product Designer

Craftsmanship and technical expertise merge to create beauty and practicality. The unique 'ribbon' leg frame is available in wood, polished aluminium and black painted aluminium.

## Precision Finish

Elegantly tailored shapes with meticulous attention to detail and finish. Clean lines and optimal comfort.

### Measurements

The measurements are approximate and can differ depending on the product configuration. Measuring methodology is available at this link: www.profim.eu/Measuring\_methodology.pdf

<sup>\*</sup> Seat height is measured according to PN EN 16139 norm (with seat burden).

## Profim and the Environment

In our operation we follow the sustainability principle. We operate in a responsible manner for the benefit of our customers, employees, suppliers, and the local community, but we always respect the environment.

In order to achieve our goals, we have implemented Environmental Management System based on the ISO 14001 standard, which allows for a comprehensive approach to ecology. We take into consideration and evaluate the way SoftBox products affect the environment during their entire life cycle.
